<p>... A way to address this question is to take advantage of virtual environments to recreate real-life situations that might arise in performance-based assessments. We propose virtual reality (VR) as a very promising tool to observe various leadership related behavioral patterns during dynamic, complex and realistic situations. By seamlessly embedding assessment methods into virtual learning environments, VR can provide objective assessment methods with high ecological validity....</p>	<p>Virtual Reality as an Emerging Methodology for Leadership Assessment and Training (semanticscholar.org)</p>
<p>For the skills associated with successful military leadership, our inability to model human behavior to the necessary degree of fidelity in constructive simulations requires that new interactive designs be developed. The ICT Leaders project supports leadership development through the use of branching storylines realized within a virtual reality environment. Trainees assume a role in a fictional scenario, where the decisions that they make in this environment ultimately affect the success of a mission....</p>	<p>Branching Storylines in Virtual Reality Environments for Leadership Development (semanticscholar.org)</p>
<p>... "They can make mistakes and learn from those mistakes without any of the negative consequences associated with them, like tripping over your words, losing your train of thought, or panic" Benefits of VR in leadership development</p> <p>1. VR can provide leadership training in a safe, practice environment This is the most obvious benefit of using VR. It provides opportunities for training leaders in safe, secure practice environments....</p>	<p>Future Of Leadership Development: Virtual Reality & Corporate ... (colinjamesmethod.com)</p>
